The COP approach empowers the Neighborhood watch groups to harness the power of working as a Team member with all the County Public Safety agencies and departments, which in turn, allows addressing all public safety issues which may exist within the community.

The Sheriff's Office provides **Organization, Education, and Training**, but it is through the cooperative efforts of all of the County's public safety resources combined with the neighborhood communities input that results are obtained.

The results achieved have clearly validated this process of the Community Neighborhoods becoming re-involved as a "solution providers" for issues/"problems" that may exist within it. All citizens within their respective neighborhoods are empowered through this process and can have a voice in addressing concerns that need solutions.
